We pride ourselves on guiding you to take your team to the next level and helping you help them reach their fullest potential.

# Program Focus

Communication within a team can often be a challenge. Though a team has their sport in common with one another, all members come from different backgrounds and have all different personalities. Research shows that over 75% of coaches are unaware of who their players are outside of their sport, which can greatly impact the overall team chemistry. The Enneagram is here to change that! Implementing the Enneagram into your team could resolve most to all miscommunication through the knowledge of how everyone best listens and communicates. Training your team to understand the Enneagram will not only bond your team closer to one another, but closer to you as a coach as well. So, let's get started!
